

Ocean State Job Lot

Multiple Locations

“They’ve streamlined 31 of our facilities. All are way ahead of projected savings.”

Ocean State Job Lot needed ways to put energy efficiency on a fast track across its retail outlets. RISE responded with a comprehensive program including state-of-the-art energy management systems and facility-wide lighting upgrades.

Ken Whitson
Property Manager

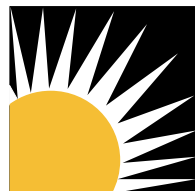

“Other proposals focused on the low-hanging fruit. We wanted to shake the whole tree.”

Networked thermostats, two-level lighting relays and occupancy sensors provide tight control across multiple areas and dayparts. Vending machine controls eliminate a hidden power drain by reducing energy use during off-hours. The installation of standardized equipment, backed with extensive warranties, simplifies downstream operation and maintenance.

“We should have done this five years ago.”

From initial discussions and assessment – through clear, concise training of facility personnel – the interpersonal skills of RISE project managers and technicians complete the picture. Ocean State Job Lot is now calling on RISE to repeat this proven success model in additional locations.
